

The Leading Manufacturer
of Non-Marring,
Non-Sparking Hammers,
Proudly Made in the USA,
Since 1956.

All of our hammers feature:

- 1. NON-SPARKING HEAD**
For safe use near combustible materials.
- 2. NON-MARRING HEAD**
Helps absorb impact and helps reduce work damage where surface protection is critical.
- 3. DOUBLE FACED HEAD**
Cast barrel shaped head offers maximum striking surface while enhancing balance.
- 4. WOOD HANDLES**
Our Tennessee grade-A Hickory handles are specially tapered, fire finished, with a tough urethane coating applied, providing better durability and UV protection. They have a textured handle providing a non-slip grip while striking.
- 5. FIBERGLASS HANDLES**
Our fiberglass handles are high visibility yellow in color and are ergonomically designed to help prevent injury from repeated use. Cushion grips provide a non-slip grip and maximum comfort while striking. Shoulder protector design prevents breaking during overstrikes.
- 6. BRASS WEDGES**
The ABC brass wedge permanently secures the head to the handle and eliminates the spark danger associated with steel wedges used in other hammers.

Making your workplace safer is as easy as ABC...
using non-sparking ABC Hammers in any high risk area where a spark can create a disaster.

**Setting a New Standard
for Dead Blow Soft Face
Performance.**

DEAD BLOW HAMMERS FEATURES & BENEFITS:

1 HOT CAST POLYURETHANE CONSTRUCTION

Our dead blow hammers are a one piece, hot cast polyurethane construction, engineered to perform better and outlast rawhide, rubber, lead and other plastic type hammers by 10-20 times. Utilizing the benefits of polyurethane technology, no other plastic or rubber materials currently used can result in a stronger, longer lasting dead blow hammer. High visibility "Red" color makes them easier and quicker to spot on the job.

2 STEEL SHOT FILLED CANISTER

Steel shot filled canister creates a dead blow effect for sustained impact, maximum force and power, reduces or eliminates rebound and absorbs the shock on impact. The free flowing shot concentrates the intensity of the hammer strike and increases striking force by up to 40 percent. It also absorbs the blow minimizing bounce back, reducing fatigue and the risk of injury, and improving productivity.

3 POLYURETHANE CONVEX STRIKING FACE

Convex faces on heads resist chipping, splitting and are cut resistant. They are designed to withstand severe striking applications. The heads provide a non marring contact surface that eliminates or minimizes denting, marring and damage to struck objects.

4 STEEL REINFORCED POLYURETHANE HANDLE

Handles have a heat treated steel reinforced rod that provides added strength and safety by resisting breaking on overstrikes. The handle is fully encased in hot cast custom formulated polyurethane. The comfort design handle absorbs shock, ensures comfort and has a slip-resistant grip along with a flared end which helps prevent the hammer from slipping. Handle over-grip adds an extra layer of protection to the hot cast polyurethane construction.

5 NON-SPARKING, NON-MARRING AND CHEMICAL RESISTANT

Our dead blow hammers are completely encased with unique polyurethane which eliminates any exposed metal making them spark-resistant for safe use near combustible materials. This specially formulated polyurethane resists most oil, solvents and chemicals. They are also non-marring making them the perfect tool for virtually any hammering application.
